The screenshot shows a web browser window displaying a Web of Science article. The article title is "Librarian as data migrator: a functional pathway from Millennium to Koha Integrated Library System" by Todd, C. The article is from "Digital Library Perspectives" (2018), Volume 34, Issue 1, Pages 60-69. The article type is "Article".

A Kopernio overlay is visible on the right side of the page, indicating that the "Article PDF found". The overlay also shows the article title and author information.

The article abstract is as follows:

Abstract

Purpose - This case study aims to demonstrate that in-house integrated library systems migration can be accomplished by a dedicated team of librarians without advanced tools or prior experience with data migration or systems integration.

Design/methodology/approach - This migration was accomplished by academic librarians using freely available tools: OpenOffice Calc, MarcEdit and the Koha Integrated Library System.

Findings - The data migration pathway presented here was developed and successfully used to transfer over 48,000 records in less than two months.

Practical implications - This case study presents an original process that is particularly effective for smaller libraries.

Originality/value - While similar case studies exist, most employ expensive third-party contractors for data migration or rely heavily on institutional IT departments.

The article has been cited 3 times in all databases. The most recently cited by is Chaputula, Aubrey; Kanyundo, Allan. Use of Koha-integrated library system by...

FEATURE

Citation Tools in Academic Libraries

Best Practices for Reference and Instruction

In recent years libraries have seen an increase in the number and complexity of citation management programs like Zotero, RefWorks and Endnote, and with this an expanded role for libraries in support of citation and research management. But how should libraries best support citation management and the needs of users and how do the tools fit into information

research process. With increasing support and instruction for citation managers in libraries and institutions marketing these tools to users, librarians and library staff may feel overwhelmed by the options, features and best uses of these tools. Public service librarians and staff may also feel pressure to recommend a citation manager too
